INTRODUCTION

As introduced in Sprint 1 Talent Bridge is a web-based platform that connects students with employers through skills-based opportunity matching. It allows students to showcase their skills, find relevant opportunities and track applications, while employers can post vacancies and identify suitable candidates. This sprint builds upon the initial concept and requirements established in Sprint 1.

User Stories

The user stories for Talent Bridge are derived from the use case diagram presented below. They describe the main requirements and functionalities of the platform from the perspectives of three different users: Student, Employer and Administrator. Each user story explains what the respective user wants to achieve and how the system supports their needs. These user stories provide a clear foundation for the system's design, development and implementation.

Student User Stories

- As a student, I want to register and log in so that I can access Talent Bridge.
- As a student, I want to create and update my profile so that employers can view my information.
- As a student, I want to add and update my skills and experience so that I can showcase my abilities.
- As a student, I want to search and filter opportunities so that I can find suitable jobs and internships.
- As a student, I want to view my skill match and missing skills so that I can understand my suitability for an opportunity.
- As a student, I want to submit applications for opportunities so that employers can consider me.
- As a student, I want to view and track my applications so that I can check their progress.

Employer User Stories

- As an employer, I want to register and log in so that I can access the platform.
- As an employer, I want to create and update my company profile so that students can learn about my organisation.
- As an employer, I want to create, edit and close vacancies so that I can manage available opportunities.
- As an employer, I want to define required and preferred skills so that students understand the vacancy requirements.
- As an employer, I want to view and filter applicants so that I can identify suitable candidates.
- As an employer, I want to review applications and update their status so that I can manage the recruitment process.
